## Guidelines Adopted as a result of Employee Meeting: Mitigating Covid-19 Exposure.

March 27, 2020

We reviewed and copied Palm Beach County Emergency Order 2020-002. This order (as with many others) lists Exterminator services as 'Essential'.

<http://discover.pbcgov.org/PDF/COVID19/Emergency-Order-Number-2.pdf>

We reviewed the Guidance on Preparing Workplaces for COVID-19 publication OSHA3990.pdf (<https://www.osha.gov/Publications/OSHA3990.pdf>).

<https://www.cdc.gov/coronavirus/2019-ncov/community/guidance-business-response.html>

We reviewed our personal protective equipment (PPE) procedures as directed by FDACS and label instructions.

We discussed how to better protect ourselves along with posing minimal risk to our customers.

Before entering a home or business, we'll ask if anyone has been in contact with someone who may have covid-19. If the answer is yes, then only an exterior perimeter application is performed.

We will provide exterior applications unless interior application is requested by the customer. If the interior is done, we'll keep the CDC recommended 6-foot space between us and our customers, even if that means they wait outside or in another room until the job is done. We will wear gloves and disinfect our hands after each interior service.

Covid-19 exposure is not likely to occur during the scope of our landscape operations. We will keep in mind the recommended 6-foot person to person distance. All PPE required by L&O product labeling will be adhered to.
